Sonoma County

Marketing Sonoma County Agriculture

OFFICE OF THE AGRICULTURAL COMMISSIONER

William J. Lyons, Jr., Secretary
California Department of Food and Agriculture

April 2002

Sonoma County Board Of Supervisors:

Michael J. Cale - District 1
Mike Kerns - District 2, Chairman

Tim Smith - District 3
Paul L. Kelley - District 4
Mike Reilly - District 5

The Sonoma County crop report for the year 2001 continues to show the economic strength of agriculture in Sonoma County. Although the total value of production dropped by over \$7 million when compared with the record total of 2000, the **\$584,064,000** worth of agricultural commodities sold from our farms and ranches is still a significant figure. Again, the continued strength of the wine grape market was responsible for \$380 million of our total or 65%, even as the tonnage decreased. The value of milk produced in our county rose to almost \$91 million, 15.5% of our total, as prices to the producers increased in 2001.

The cover of this year's report focuses on a number of agricultural marketing organizations. In today's market, it is not enough that you produce a quality product and sell it at a fair price. It is necessary to promote Sonoma County, our wonderful countryside and the wonderful commodities that we produce.

Sales of nursery products fell by 10% as those sales were affected by the slowing economy and the decrease in demand for grape planting stock. Field crop value increased as tonnage and value for oat silage increased, as did the tonnage and value for oat hay.

Last year's vegetable total was revised upward and this year's total showed a decrease of \$2 million. The figures we report rely heavily on the cooperation of the producers giving us information so that we can properly recognize their contribution to our agricultural value and diversity.

Livestock and Poultry values increased by \$1.1 million based on the increase seen in miscellaneous livestock and poultry which includes chicks, ducks, turkey poults, fryers, roasters and turkeys.

We have not included the Bodega Bay commercial fish catch, as the information was not available from the Department of Fish and Game. As always, the information presented in this report represents gross production and does not infer net farm income. Thanks to all the farmers and ranchers who provided a majority of the production figures for this report.

Thanks again to Cree Morgan, Marilyn Vernon, and Nancy Fiddler for their efforts in producing this report. Their work in gathering information on production and acreage is never ending and always changing.

Respectfully submitted,

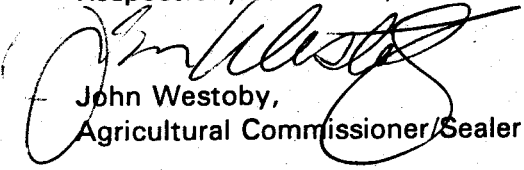

John Westoby,
Agricultural Commissioner/Sealer

MARKETING SONOMA COUNTY AGRICULTURE

Agriculture (n): “...*the science, art or practice of cultivating the soil, producing crops, and raising livestock and in varying degrees the preparation and marketing of the resulting products.*” (Webster’s Dictionary)

Why is it that we need to market our agricultural commodities? Why, in Sonoma County, do we have organizations, some of which are represented on this cover, to promote what we already know are wonderful products?

The answer, to an extent, comes from history. Once man was able to advance beyond subsistence farming and produce more than was needed to meet his own needs, he was faced with the challenge of what to do with this excess. This productivity freed others to move into education, business, professions and the arts.

In fact, farmers (less than 2% of the population) have been so successful, each one producing enough for one hundred-twenty people, that food has been taken for granted. Without it, all our other enterprises would quickly collapse, but when we consider its source we usually think only of the nearest grocery store.

Our agricultural successes have worked to limit the type of commodity that can be economically sustainable in an area. Through the years Sonoma County has successfully grown hops, apples, pears, prunes, eggs, milk, livestock, and wine grapes.

Today, due to worldwide competition (where cost and quality are judged, with an emphasis on cost) we have only been able to compete successfully on a large scale with wine grapes, milk, livestock, and nursery production. Just because we can grow fine quality products in an environmentally favorable way does not mean that consumers will line up to purchase that commodity.

Many are calling for more diversity of agriculture. That is a wonderful desire; one that we share. Yet we face a great challenge: to find agricultural entrepreneurs who are willing to take the risk on success in a place where land is extremely expensive, weather unpredictable, labor scarce, and the wholesale purchase price for fruits and vegetables extremely low. We need incentives to attract those energetic and visionary young people who see a way to make it work. We applaud the work of the Sonoma County Agricultural Preservation & Open Space District and its allies trying to bring young farmers onto lands owned by the county. We applaud the marketing organizations that care about our local farmers and ranchers and we encourage them to redouble their efforts, to coordinate their thinking and activities, and to keep the faith in these challenging times. Keeping Sonoma County Agriculture vibrant and diverse is a challenge that we all must rise to meet: consumers, producers, and leaders.

It is a fact for all businesses, agriculture included, that success is defined by profitability. If we want our quality products to remain successful in Sonoma County, we all need to support our local growers. Remember the extra cost now will help preserve the continued beauty and rural character of Sonoma County.

Thankfully, there are still small producers in Sonoma County who are producing milk and cheese, vegetables, herbs, nursery stock, flowers, apples and other fruits. Many have found niche markets that show a demand for our premium quality and can support our higher production costs.

Marketing is a vital piece of the puzzle and the cover is a tribute to those organizations working hard to let consumers know about our premium quality products and the people who produce them.

In researching this year's theme, *Marketing Sonoma County Agriculture*, we realized that there were a large number of appellation groups, brands, and organizations that market Sonoma County Agriculture to the world. The five groups we chose for our cover are countywide and are made up of individual members. Below is a further discussion of these groups.

Select! Sonoma

Select! Sonoma County is a non-profit agricultural marketing organization that develops promotions, education programs and marketing opportunities for Sonoma County's agricultural producers. It holds the license for the trademarked "Sonoma Grown™" and "Sonoma Made™" logos. Our purpose is to enhance opportunities for Sonoma County's agricultural sector, to improve its economic well-being and to motivate consumers to purchase Sonoma County agricultural products. SSC is a nonprofit 501 (c) 3 educational organization, which is a partnership between agricultural producers, dedicated consumers, retailers, and other individuals and entities committed to the organization's mission.

Select! Sonoma is an agricultural marketing, education, and promotions organization founded in 1989. Members are a Who's Who of food and wine growers and purveyors and supporters in retail, restaurant, and service industries.

Sonoma County Farm Bureau

The Sonoma County Farm Bureau is the "voice of agriculture". Farm Bureau is an 84-year-old membership trade organization that represents and supports the diverse interests of the agricultural community. Farm Bureau works to educate the community about the importance of agricultural activities in our diverse economy. It strives to teach our youth about the origin of our food and fiber.

The Farm Bureau is very involved in a variety of issues that affect the viability of the industry, including environmental issues, conservation, land use policies, labor, safety, taxation, agricultural production, pest management, water & air quality, agricultural processing and marketing and many more.

With an original membership of 600 farming families, the Sonoma County Farm Bureau (SCFB) held their first meetings in the basement of the Sonoma County Court House (later home to the Farm Advisors and Agricultural Commissioner's Office) in October of 1917. By-laws were finalized and officers were elected, including the first president, Sheridan W. Baker.

Soon after organizing, SCFB began working on building membership and setting up centers. The county was divided up into geographic centers, which allowed members to meet and discuss concerns. A representative brought the center's concerns to the county board of directors. In 1922, 30 centers existed in Sonoma County. As more efficient modes of transportation evolved, allowing farmers to travel farther to the county meetings, many centers combined or disbanded. Today, there are just three active centers in Sonoma County.

Sonoma County Farm Trails

Sonoma County Farm Trails supports sustainable agricultural diversity in Sonoma County through the promotion of its members' products via on-site sales, organized retail opportunities, marketing and public relations campaigns, and educational forums that create public awareness to ensure the preservation of Sonoma County's rich agricultural heritage for generations to come.

In 1972, a group of Sonoma County farmers were concerned about how they could better market their products. The U.C. Cooperative Extension Office convinced them to publish a map directing the public to their farms. The sales of their produce increased and the public enjoyed the experience of visiting the farms. The first year's activities were funded by a \$2,500 grant from the Board of Supervisors. This grant was not needed the following year, due chiefly to the development of the Gravenstein Apple Fair and other fundraisers.

Farm Trails continues to be self-supporting. Farm Trails was greatly aided by early guidance of the Sonoma County Farm Bureau, which provided legal council.

Today, Farm Trails continues to be a powerful marketing organization, promoting its many members through the publication of its familiar Sonoma County Farm Trails Map & Guide. It continues to grow in popularity and is an integral part of both the county's agricultural base and tourist industry. Farm Trails has led the way linking and partnering with other promotional organizations. The concept has served as a model for many other communities.

Sonoma County Grape Growers Association

The mission of the Sonoma County Grape Growers Association (SCGGA) is to insure a viable, profitable winegrape growing industry in Sonoma County through education, promotion, and community involvement.

When the SCGGA was formed in 1984, Sonoma County was not recognized as a premier winegrowing region. Many growers still sold grapes to bulk wine producers, although the conversion to premium grape varieties and the emergence of world-class Sonoma County wines had largely been achieved. The challenge was for wine consumers to discover these new wines being produced in Sonoma County.

The SCGGA has sustained wine education and promotion in order to build demand for Sonoma County wines and members' grapes. By 1990, Sonoma County wines were consistently winning more awards in nine California wine competitions than any other region of the state. The dominance of Sonoma County wines in these competitions continues after 12 years. Consumers have grown to realize Sonoma County wines are consistently of high quality, regardless of variety.

Today, due in part to SCGGA's marketing efforts, Sonoma County is broadly recognized as a premier winegrowing region, not only in California, but also in the world. Sonoma County is a destination for tourists who want to experience the food, wine, and scenery we offer. And SCGGA continues to promote our region and its wines.

Sonoma County Wineries Association

Sonoma County Wineries Association is an Association of Individuals who are now engaged in the manufacturing of wines in the County of Sonoma for the purpose of:

- *Advancing the interests of the winegrowing industry through the improvement of types and varieties*
- *To enhance the value attached to Sonoma County wine in the world market*
- *To foster and perpetuate the best traditions in wine making, and the various common interests of the wine industry in Sonoma County*

It is the firm belief of the members of this association that by its establishment it may be able to serve not only the industry itself, but the interests of Sonoma County.

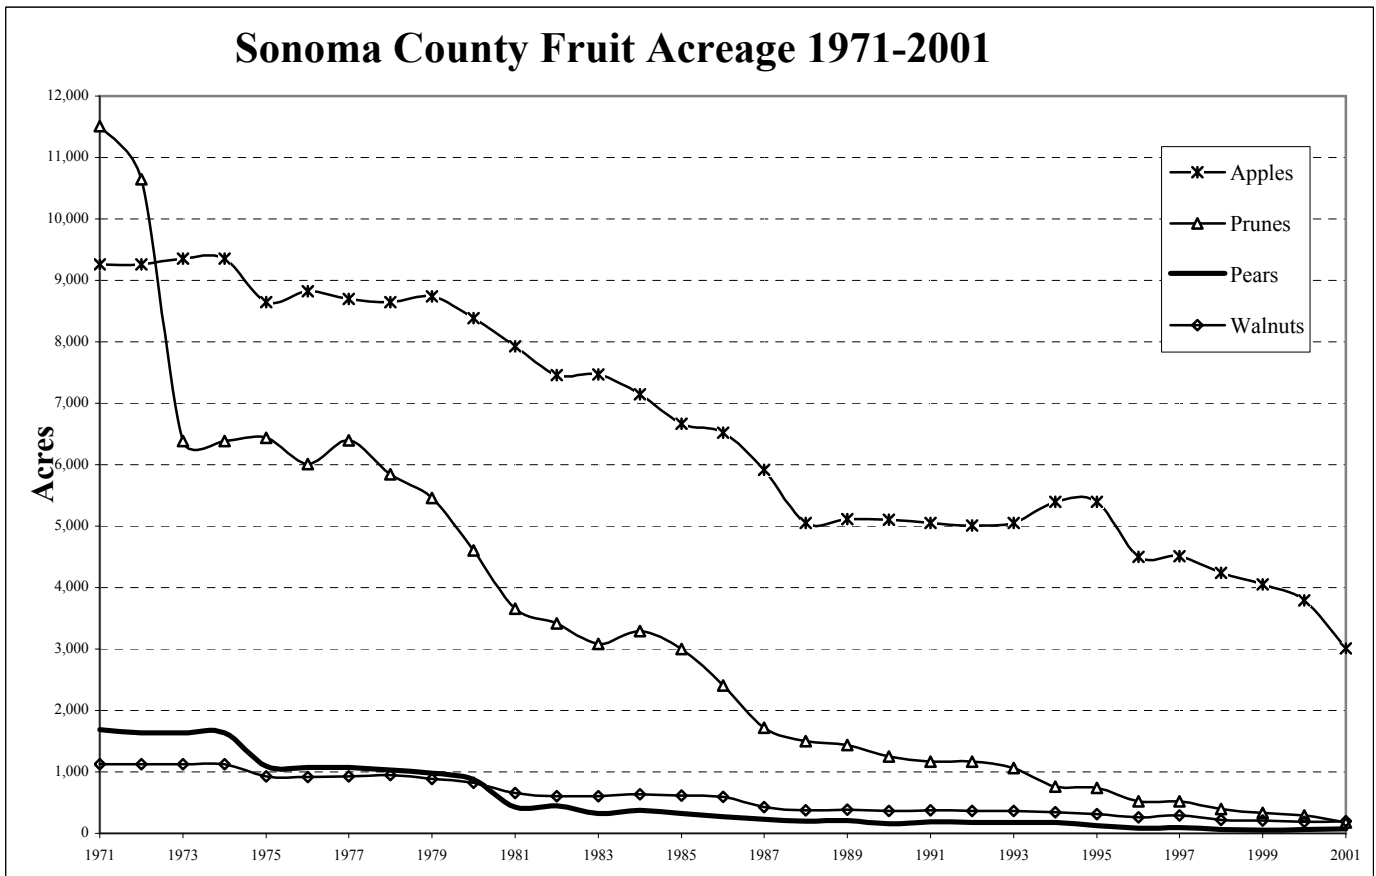

In 1946, a group of Sonoma County vintners and winegrape growers gathered as friends to exchange ideas and concerns on mutual problems. In the following years the response to the industry interests became more coordinated. The Sonoma County Wine Grower Association grew, undertook national activities, and expanded its programs to promote Sonoma County as a premium grape-growing region. The Sonoma County Wineries Association has consistently maintained its focus of creating the awareness of Sonoma County as premium wine grape growing and wine producing region.

Crop	Year	Harvested Acreage	Dollar Value
Miscellaneous Truck Farms (E)	2001	438	\$ 10,119,500
	2000*	659	\$ 12,140,600*

(E) includes melons, mushrooms, potatoes, pumpkins, sprouts, squash, tomatoes, lettuces, etc.

* Revised

Timber Harvest

(Informational Only-- most recent figures available, furnished by State Board of Equalization)

Crop	Year	Production	Unit (F)	Value (G)
Timber	2001	24,157,000	board feet	\$ 19,494,000
	2000	30,918,000	board feet	\$ 14,231,400

(F) board feet is the quantity of timber cut and scaled

(G) value of the timber immediately before cutting

FIELD CROPS

Crop	Year	Harvested Acreage	Ton/Acre	Total Tons	Units	DOLLAR VALUE	
						\$/Unit	Total
Hay, Oat	2001	7,806	2.14	16,710	ton	\$ 78.14	\$ 1,305,800
	2000	5,986	2.58	15,442	ton	\$ 76.65	\$ 1,183,700
Hay, Volunteer	2001	853	2.43	2,071	ton	\$ 72.88	\$ 151,000
	2000	1,028	2.14	2,205	ton	\$ 65.17	\$ 143,700
Green Chop (A)	2001	340	13.85	4,708	ton	\$ 13.43	\$ 63,300
	2000	470	8.95	4,205	ton	\$ 17.86	\$ 75,100
Oats, Grain	2001	717	2.95	2,112	ton	\$ 106.96	\$ 225,900
	2000	919	2.42	2,221	ton	\$ 105.90	\$ 235,200
Silage, Corn (A)	2001	385	23.81	9,165	ton	\$ 37.09	\$ 340,000
	2000	385	24.06	9,264	ton	\$ 34.00	\$ 351,600
Silage, Oat (A)	2001	5,197	11.47	59,603	ton	\$ 32.09	\$ 1,912,700
	2000	4,251	10.63	45,200	ton	\$ 29.00	\$ 1,490,700
Straw	2001						\$ 113,700
	2000						\$ 23,100
Pasture, Irrigated (B)	2001	9,450			acre	\$ 100.00	\$ 945,000
	2000	9,550			acre	\$ 100.00	\$ 955,000
Grassland (B)	2001	204,314			acre	\$ 10.00	\$ 2,043,200
	2000	204,414			acre	\$ 10.00	\$ 2,044,100
Woodland (B)	2001	172,525			acre	\$ 1.00	\$ 172,600
	2000	172,625			acre	\$ 1.00	\$ 172,600
Miscellaneous (C)	2001						\$ 533,100
	2000						\$ 503,600
TOTAL	2001						\$ 7,806,300
	2000						\$ 7,178,400

- (A) much of the green chop and silage is not sold but used on the farm-- value is determined by it's feed equivalent
 (B) estimated
 (C) includes alfalfa, barley, safflower, wheat, rye, vetch, Sudan, etc.

Major Crop Values 1939-2001 (in 2001 dollars)

Livestock and Poultry

Item	Year	Number of Head	Total Live Weight	Unit	Dollar Value	
					\$/Unit	Total
Cattle/Calves	2001	34,506	181,442	cwt.	\$ 66.12	\$ 11,997,000
	2000	34,984	186,718	cwt.	\$ 66.54	\$ 12,424,200
Sheep/Lambs	2001	19,109	20,378	cwt.	\$ 69.00	\$ 1,406,100
	2000	20,052	21,384	cwt.	\$ 70.75	\$ 1,512,900
Hogs	2001	1,634	3,901	cwt.	\$ 43.00	\$ 167,800
	2000	2,042	4,876	cwt.	\$ 44.10	\$ 203,100
Miscellaneous (A)	2001					\$ 41,755,800
	2000					\$ 40,054,400
TOTAL	2001					\$ 55,326,700
	2000					\$ 54,194,600

(A) includes chicks, ducks, turkey poults, fryers, roasters, turkeys, etc.

Livestock and Poultry Products

Item	Year	Production	Unit	Dollar Value	
				\$/Unit	Total
Milk, Market	2001	6,521,726	cwt.	\$ 13.93	\$ 90,847,700
	2000	6,588,643	cwt.	\$ 12.12	\$ 79,854,400
Milk, Manufacturing	2001	23,186	cwt.	\$ 14.01	\$ 324,900
	2000	29,160	cwt.	\$ 10.97	\$ 319,900
Wool	2001	91,090	lb.	\$ 0.40	\$ 36,500
	2000	79,912	lb.	\$ 0.40	\$ 32,000
Miscellaneous Products (B)	2001				\$ 8,482,100
	2000				\$ 10,612,000
TOTAL	2001				\$ 99,691,200
	2000				\$ 90,818,300

(B) includes market duck eggs, turkey hatching eggs, chicken eggs for consumption, egg bi-products and goat m

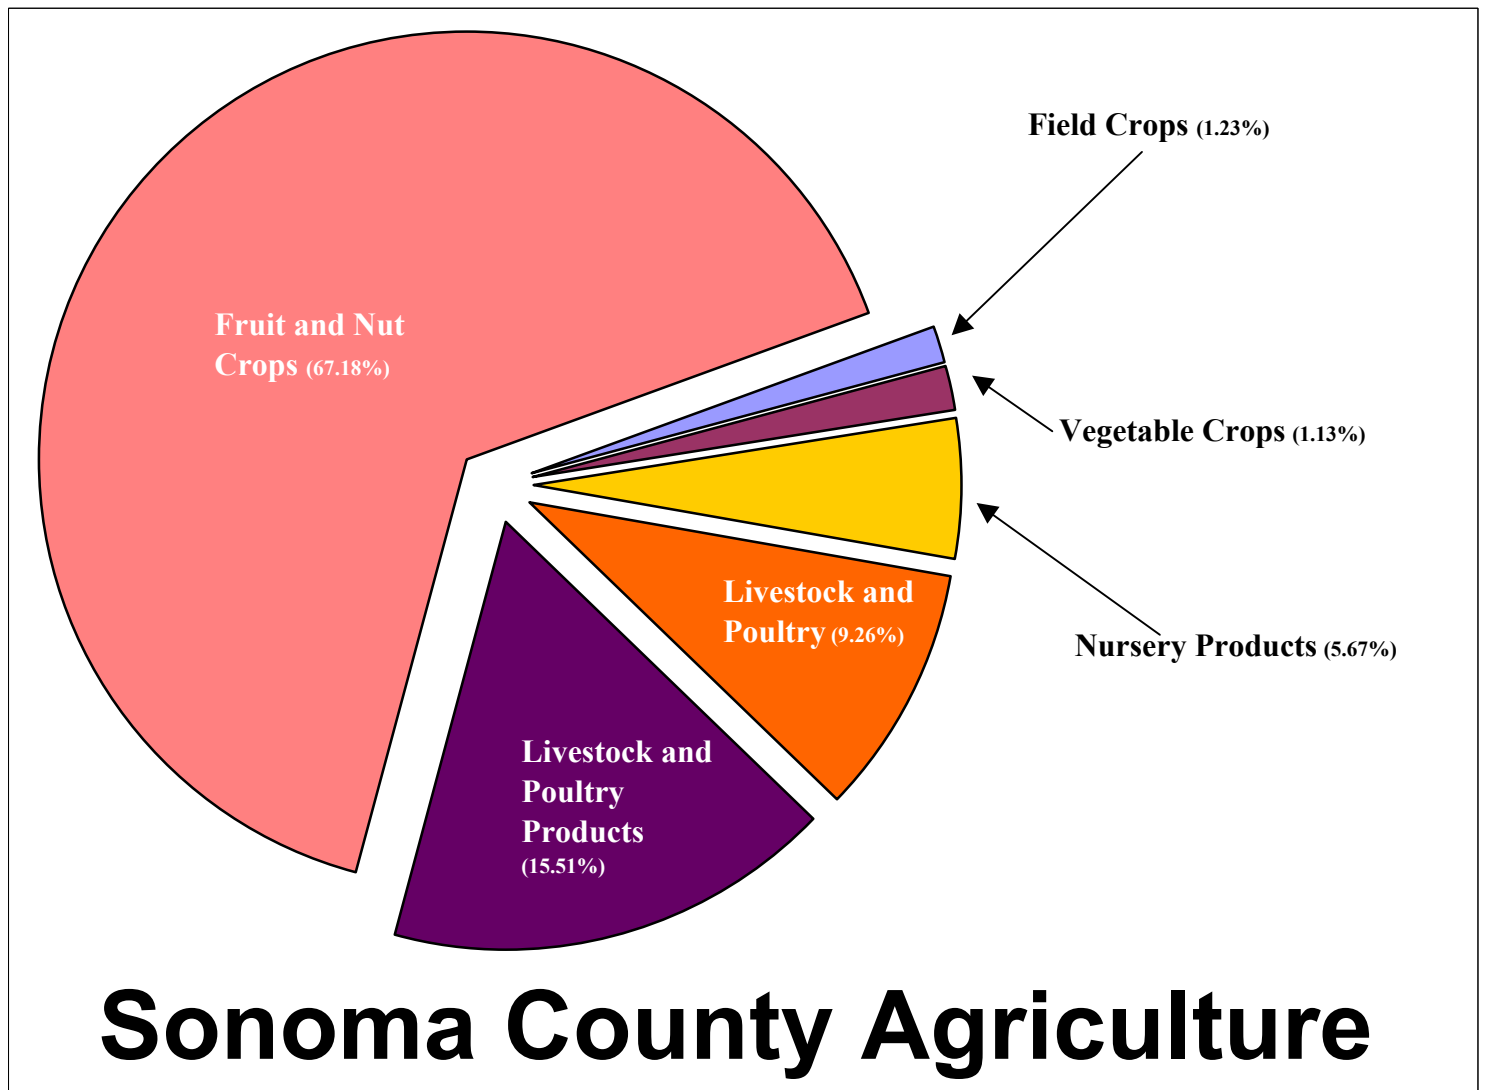

Livestock Inventory

(Number of head as of January 1, 2001)

Item	Number
Cattle and Calves (all)	83,000
Milk Cows and heifers 2 years and over	30,800
Beef cows and heifers 2 years and over	12,800
Sheep and Lambs (all)	13,100
Hogs	2,300
Laying Hens and Pullets	658,800
Turkey Breeders	55,900
Horses	13,900

Recapitulation

	2000	2001	Change
Apiary Products	\$ 129,100	\$ 112,600	-13%
Field Crops	\$ 7,178,400	\$ 7,806,300	9%
Vegetable Crops	\$ 12,140,600	\$ 10,119,500	-17%
Nursery Products	\$ 33,270,400	\$ 30,069,200	-10%
Livestock and Poultry	\$ 54,194,600	\$ 55,326,700	2%
Livestock and Poultry Products	\$ 90,818,300	\$ 99,691,200	10%
Fruit and Nut Crops	\$ 393,397,900	\$ 380,938,500	-3%
Total	\$ 591,129,300	\$ 584,064,000	-1%

Sustainable Agriculture Report

Biological Control Program

Targeted Noxious Weed	Biological Control	# of Release Sites
YELLOW STARThISTLE <i>(Centaurea solstitialis)</i>	Flower Weevil (<i>Larinus curtus</i>)	9
	Hairy Weevil (<i>Eustenopus villosus</i>)	9
RED GUM LERP PSYLLID <i>(Glycaspis brimblecombei)</i>	Red Gum Lerp Psyllid Biocontrol <i>(Psyllaphaegus blitens)</i>	2

Organic Farming Statistics

222 individual organic registrants

Commodity	Registrants	Acres
Eggs	8	N/A
Fruit/Nuts	73	1493
Grain	5	171
Milk	3	N/A
Nurseries	26	37
Vegetables	83	284
Wine Grapes	19	310
Handlers	14	N/A

Pest Detection

Trapping: There were 1,301 traps placed for the detection of exotic insect pests including Mediterranean and Oriental Fruit Flies, Melon Fly, Gypsy Moth, Japanese Beetle, Khapra Beetle, Western Grapeleaf Skeletonizer and Olive Fruit Fly. These traps were serviced 10,161 times. There were 1,052 traps placed for the Glassy-Winged Sharpshooter (GWSS). These traps were serviced 10,810 times.

Entryway Survey: 223 miles and 19 properties were surveyed for the presence of noxious weed and disease pests.

Pest Exclusion

A total of 2,235 premise inspections for incoming shipments of plant material were made in 2001. This was a 16% decrease in inspections over 2000. Inspections occurred at the express carriers, nurseries, post office, feed mills, post entry inspections, United Parcel Service and pet stores. 449 rejections of plant material were made. The number of rejections decreased by 58% compared with 2000 rejections. Rejected plant material was either destroyed or reconditioned and released.

To prevent the spread of GWSS into Sonoma County from infested counties department personnel inspected all shipments of nursery material arriving from these counties. More than 2800 shipments were inspected; eleven were found to have viable egg masses and rejected. Wineries receiving bulk grapes from infested counties were under compliance agreements requiring the shipping vineyards to be inspected and determined to be free from GWSS or be treated. 19 wineries received 201 shipments, from seven infested counties.. All were from vineyards free from GWSS.

Listed below are a few of the economically important pest species intercepted in 2001:

Carolina Fanwort <i>Calsomba caroliniana</i>	Spotted Knapweed <i>Centaurea maculosa</i>	Green Cabomba <i>Cabomba caroliniana</i>	South American Spongeplant <i>Lomnobium laevigatum</i>
"a Foreign Weed" <i>Potala rotundifolia</i>	Glassy-Winged Sharpshooter <i>Homodiscus coagulata</i>	Purple Loosestrife <i>Lythrum salicaria</i>	Quack Grass <i>Elytrigia repens</i>
Mediterranean Fruit Fly <i>Ceratitidis capitata</i>	Olive Fruit Fly <i>Bactrocera oleae</i>	Camphor Scale <i>Pseudaonidifa duplex</i>	Azalea bark scale <i>Acanthococcus azaleae</i>
Balsam Fir Gall Midge <i>Paradiplosis tumifex</i>	Redgum Lerp Psyllid <i>Glycaspis brimblecombei</i>	Western Grapeleaf Skeletonizer <i>Harrisiana brillians</i>	"Sudden Oak Death" <i>Phytophthora ramorum</i>
